(54) MOBILE RADIO EQUIPMENT

(57)Abstract:

PURPOSE: To vary none of the resonance frequency, reception sensitivity, and directivity of the antenna during a communication through the mobile radio equipment.

CONSTITUTION: The antenna 3 is provided on one side part of a radio equipment body 1 and a connection part 5 is provided on the other side part. The connection part 5 is fitted with a hand stripe 6 formed of a material which has the same or nearly the same dielectric constant with air in a ring shape. In this case, the connection part 5 may be formed of a material which has the same or nearly the same dielectric constant with air.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of

rejection]

Date of requesting appeal against examiner's

decision of rejection]

[Date of extinction of right]
